Projects

Game Show App

Wheel of Success - Word Guessing Game

Used JavaScript to come up with a random phrase that players will try to guess by entering different letters into the program.

Technologies used: JavaScript, HTML5, CSS3

Live View: <https://karinapichardo.github.io/Game-Show-App/>

Interactive Photo Gallery

An interactive, searchable gallery of photos.

Photos update in realtime depending on what the user types into search bar. When the user clicks on a thumbnail, the photo will display in a lightbox. There's also a "back" and "previous" arrow to cycle through photos.

Technologies used: JavaScript, HTML5, CSS3, SASS

Live View: <https://karinapichardo.github.io/Interactive-Photo-Gallery/>

Gymso Fitness

Commercial website for a fitness facility built using HTML5, CSS3

Includes: AOS - "On Scroll" Animation Library, SVGS, Responsive Table, Google Map, Hamburger Menu, Contact Form

Live View: <https://github.com/karinapichardo/Gymso-Fitness>

Soft Landing Page

Commercial landing page created using HTML5, CSS3 and JavaScript

Utilized: CSS grid, Flex box, AOS scroll animation library, background-attachments, Event Listeners

Learned: how to implement a navigation scroll bar that appears only when the user scrolls down a bit using JavaScript

Live View: <https://github.com/karinapichardo/soft-landing-page>

Level Website

Hotel / Travel Website Built Using HTML5, CSS3, and Javascript

Utilized: background images and videos, flex box, css grid Learned: how to incorporate SVGS into forms / manipulate them, how to create a hamburger menu using JavaScript, how create an active state for navigation links and scroll effect using JavaScript

Live View: <https://github.com/karinapichardo/Level-Website>
